

Product Data Sheet

**Goat Anti-Rabbit IgG Antibodies and conjugates (preadsorbed with multiple species)**

**Cat#** 20321-200      **Goat Anti-Rabbit IgG-HRP conjugate**      **Size:** 0.5 ml      **Form:** Liquid; Powder

**Description**

Goats were immunized with antigen grade **Rabbit IgG (H+L)**. Antibodies have been isolated using ammonium sulfate, ion-exchange, and affinity chromatography to remove non-specific antibodies. Specificity of antibody has been tested using IEP, immunodiffusion, and ELISA. Antibodies have been preadsorbed with serum proteins from mouse, rat, human, bovine, sheep, hamster, goat, g. pig, chicken and bovine to minimize reactivity with these species. The product reacts with Rabbit IgG, IgA and IgM with no significant reactivity with other serum proteins. Purified anti-Rabbit IgG (H+L) antibody is supplied as unlabeled or conjugated to Biotin, FITC, AP or HRP.

**Form and Storage**

**Cat# 20321-200, Anti-Rabbit IgG-HRP-conjugate**

Purified antibody was coupled to HRP (RZ>3.0) using periodate method. The molar enzyme to protein (E/P) ratio = 4.0. The antibody is supplied in stabilizing buffer, 0.1% prolcin-300 as preservative in either **lyophilized** (200 ug) or **liquid** form (200 ug/0.5ml). Reconstitute powder in PBS in 0.5 ml. Store at 4oC in suitable aliquots. Stability is ~6-12 months. Do not freeze and thaw.

Suggested conjugate dilutions are 1:1,000-1:10,000 ELISA, 1:1K-1:5K for western, and 1:200-1:1000 (IHC).

**Recommended Working Dilution for ELISA**

Working dilution for the specific application should be determined by the investigator to obtain the best conditions. Working solution should be prepared immediately before use and diluted solution should be discarded.
