ALPHA DIAGNOSTIC INTERNATIONAL

Item Name Human Lymphoid Tissue Slide (Lymph node normal)

Cat# HTS-11521

Size: 1 package of 5 slides

Tissue Lines Lymphoid

Source Human

Store Stable for up to two years when stored in a cool, dry area.

Recommended Usage

Human tissue slides can be used with any antibody shown to be effective in formalin-fixed tissue using a standard immunostaining protocol.

Formalin-fixed, paraffin-embedded tissue is useful for a variety of applications including the targeting of proteins, RNA, and DNA by means of Immunohistochemistry (IHC), in-situ hybridization (ISH) and fluorescence in-situ hybridization (FISH), respectively. Some tissue types may require extra attention as they may contain high levels of endogenous biotin, peroxidase, or auto fluorescence.

Tissue Slide preparation

The single tissue slides contain 4 µm sections of formalin-fixed, paraffin-embedded human tissue (1-2 cm x 1-2 cm) affixed to Snowcoat X-tra (Surgipath) slides. Tissue diagnosis was performed by certified pathologists.

All items are for in vitro research use only
